

Logistics – Functional Observation

TOPIC/SUBJECT:	Pre/Post Trip Inspection	OBSERVER:	
DATE:		ASSOCIATE:	
OBSERVATION GOAL:	To ensure our Drivers are following the process of Pre/Post-Trip Inspections.		

Instructions

- Review:** Ensure that you have reviewed all relevant resources and learning materials before the observation.
- Schedule a Time:** Arrange a time to observe the Associate. Make sure the Associate has reviewed all resources and practiced the activity prior to the observation.
- Conduct the Activity:** Have the Associate perform the activity while you observe.
- Determine Proficiency:** Observe the Associate completing the activity and use the “look for” questions to assess whether or not the Associate is proficient.
- Debrief:** After the observation, debrief with the Associate to celebrate wins and/or coach them to proficiency.
- Capture Observation:** Record in Workday using the Observation Tool – APR Tag – Functional Observation – Safety

Look for:

If you answer “No” to any of the questions below, stop the Associate and reinforce the requirement.		Yes	No
1.	Did the Associate have the correct PPE for the activity? (i.e. slip resistant shoes and gloves)		
2.	Did the Associate complete the walk following the order of the Pre/Post-Trip Inspection Path?		
3.	Did the Associate use the checklist to ensure they inspected all items?		
4.	Did the Associate log their trip into Konexial My20 app?		
5.	If there were issues found, did they: - Refer to the Job Aid for clarification? - Note the issue on Konexial app and communicate to their FLM? - If it was an Out of Service item, did they communicate to their FLM to determine their next steps?		
6.	Pick one item in each of the sections and observe that item specifically being inspected. Ex. For the Driver’s Cab – side steps - Front Cab: - Driver’s & Passenger Engine, Suspension, & Brakes: - Driver’s Cab & Paperwork: - Rear Cab: - Driver’s Side Trailer: - Rear Trailer: - Passenger Side Trailer: - Passenger Cab: - Interior Cab: - Air Brake Test:		
7.	Ask: Why is important to complete a Pre/Post-Trip Inspection with each use of the vehicle? <i>Yes, if the answers include the concepts of: Standardization, Vehicle Safety, Vehicle Readiness or Efficiency</i>		

Responsible Party	Logistics	Last Review Date	4/14/2025
-------------------	-----------	------------------	-----------

IF YOU ANSWERED “NO” TO ANY OF THE QUESTIONS THE ASSOCIATE IS NOT PROFICIENT AND WILL NEED TO BE OBSERVED AGAIN TO CONFIRM PROFICIENCY.

Functional Observation

Example: On the April 4, I observed Sam complete a Pre-Trip Inspection on a 7-car hauler and they were proficient. They clearly inspected all areas of the truck and confirmed no issues. I observed them using the checklist to ensure they looked for all items. When they had a question about what to look for on the ladder, they referred to the job aid to confirm what to look for. When asked why a pre-trip inspection was important to complete, they referred to a standardized process and the importance of every driver inspected the same items. The impact is that Sam has now demonstrated their ability to complete the Pre/Post-Trip Inspection. I will now certify Sam in Workday on the 7-car hauler.

If this is a part of the Certification process – Once the observation has been documented in Workday, record certification in Workday for the specific truck model observed.

- In Workday search [Add Certification], enter the name, click [add], in the [Certification] spot type “Pre” and search. Choose the correct certification and enter the [Issued Date].
