Exceptional

Top Competency

One of my strongest contributions this year has been training new associates. I directly supported the development of three new hires who now form the rest of my current team. I provided hands-on instruction, reinforced CarMax's loading and safety procedures, and gave real-time feedback during pre-trip inspections and delivery operations. Additionally, I created visual aids and team messages to highlight critical procedures, especially regarding load positioning, inspection checklists, and vehicle height awareness to help others learn more efficiently and confidently.

Bottom Competency

While I've made progress using mobile tools like the CarMax Driver app and OTM, I recognize there's still room for improvement with certain internal platforms. I plan to better integrate those tools into my daily workflow.

Overall Summary – Look Back

Over the past year, I remained consistent in upholding safety, professionalism, and teamwork. I've taken the initiative to coach others, model proper inspection and loading processes, and step in to assist the team when needed, including covering responsibilities and sharing knowledge through both verbal guidance and visual materials. These actions helped strengthen our team's performance and safety culture.

Overall Summary – Look Forward

Looking ahead, I intend to sharpen my technical proficiency with company platforms while continuing to lead by example in safety and team collaboration. I also plan to focus on completing formal IDPs to support my professional growth. These steps will better position me as both a peer leader and a strong candidate for future leadership opportunities at CarMax.
